NON-SURGICAL LIFTING & TIGHTENING

Plasma Fibroblast

PLASMA BLAZE

Plasma Fibroblast is a non-surgical, non-invasive ground-breaking skin tightening treatment for immediate and long-term face and body rejuvenation — increasing collagen production and elasticity, smoothing the signs of ageing and reducing scar tissue.

Plasma energy arcs create microscopic dots across the skin's surface, instantly contracting loose skin to visibly lift and tighten. Results continue to improve for 3-6 months post treatment depending on age, lifestyle and severity of the area, and last up to 5 years. Scar treatments using the fibroblast method are permanent.

RESULTS LAST	KEEPS IMPROVING	SCAR TREATMENTS
Up to 5 years	3-6 months post	Permanent

FACE & EYES

Mid face or jowl lift	\$700	\$1,400
Full face	\$1,500	\$2,999

TARGETED FAT REDUCTION

Cryolipolysis

FAT FREEZING

Finally there is an answer to the stubborn fat that even diet and exercise can't seem to get rid of. Cryolipolysis is approved by the FDA for the treatment of localised fat deposits that lie just beneath the skin — a natural way to get results without surgery or downtime.

In most cases we recommend between 2 and 4 sessions in the same area to achieve the best result. Your consultant will confirm the right course for you at your consultation.

RECOMMENDED	PER AREA	DOWNTIME
2-4 sessions	Same area repeat	None

SESSIONS

Single hand piece	\$250	Prepay 3 · \$700
Dual hand piece	\$350	Prepay 3 · \$1,000
Chin sculpting	\$195	Prepay 3 · \$500

COLLAGEN STIMULATION

RF Skin Tightening

RADIO FREQUENCY

Radio Frequency is a groundbreaking treatment that noticeably reduces the signs of ageing and tightens your skin.

RF skin tightening uses radio frequency energy to heat the skin, which stimulates collagen, elastin and hyaluronic acid production to reduce the appearance of loose skin and fine lines. RF offers visible results, with a recommended 6-12 treatments at weekly or fortnightly intervals.

RECOMMENDED COURSE	INTERVAL	6 PACK SAVING

NON-INVASIVE BODY CONTOURING

Ultrasound Fat Cavitation

Ultrasound technology helps drain fat cells using low frequency sound waves — a natural method replacing traditional treatments such as tummy tucks and liposuction. There are no knives, no anaesthesia and no surgery.

An average of 6 to 12 treatments are required. Each individual varies, and your consultant will tailor your plan based on your individual needs.

RECOMMENDED COURSE	TREATMENT AREA	SURGERY
6-12 treatments	Single area, A5 size	None required

CAVITATION ONLY *Single area, A5 size*

RESURFACING & DEEP HYDRATION

Hydro & Microdermabrasion

Hydrodermabrasion is a non-invasive, water and live-serum based resurfacing facial that combines pressurised water and oxygen to softly exfoliate the top layers of the skin, removing dead skin cells and impurities while hydrating for instant rejuvenation and repair.

Microdermabrasion uses a diamond-tipped wand to exfoliate the uneven outer layer of the skin, improving texture, tone and sun damage while reducing fine lines and enlarged pores. A combination of both is recommended for optimum results.

BEST RESULTS	6 PACK SAVING	FULL TREATMENT

COLLAGEN INDUCTION THERAPY

Skin Needling

Skin needling, also referred to as Collagen Induction Therapy (CIT), stimulates the body's own collagen production to reduce the appearance of fine lines and wrinkles, stretchmarks, skin laxity and scarring such as that caused by acne.

Gold surgical grade needles introduce a series of fine micro-perforations in the skin, triggering the body to fill them by producing new collagen and elastin. A course of 6-12 treatments is recommended for optimal results.

RECOMMENDED COURSE 6-12 treatments	NEEDLES Gold surgical grade	ALSO KNOWN AS Collagen induction therapy
